C/10 Wing Mount Instructions

Thank you!

Thank you for purchasing a product from Level 7 Motorsports! We have been in business since 2001 and have built a very diverse list of completed projects. Some of these projects have shown us a need for certain parts in the market. We are very passionate about what we do and are fortunate enough to be able to share some of these parts with you.

Product Information

For this spoiler installation you will be drilling holes in your tailgate and installing threaded inserts into those holes. You will need a Thread Insert Tool which is also known as a Rivnut Tool. The least expensive tool can be purchased from Harbor Freight Item#1210. For this installation it is easiest to remove the tailgate from the truck and place it onto a table. Step 1 is to attach the polycarbonate piece to the top of the aluminum mount. Step 2 you will place the aluminum wing mount onto the tailgate. For best results center the wing from left to right and position it so that the poly just touches the top of the tailgate. Step 3 simply transfer the holes to the tailgate while someone else holds the wing steady. Step 4 once the holes are marked, use a center punch and drill the holes with an 1/8" bit. Now you can step up to your final drill hole which is 23/64". Step 5 is to now use the rivnut tool to install the threaded inserts. We have included 2 extra inserts for you to practice with before you go at your tailgate. PLEASE TEST FIRST! Step 5 is to simply install the part onto the tailgate. Please use a small amount of anti-seize on the threads. YOU DO NOT want to cross thread your rivnut! It will spin in the sheetmetal and you will have a nightmare on your hands. Please feel free to contact us with ANY questions or concerns. Again thank you very much from our family.
